

Living Chess Game

"The True King"

Synopsis: King Henry refuses to recognize either of Queen Eleanor's sons as legitimate heirs to his throne. Eleanor's battles with Henry have led him to distrust her. So she has offered a chance to parlay in neutral territory. The King of Hoggetowne has offered his lands as an opportunity to settle their differences. Henry has decided that he will accept the winner of a chess match between the two sons as the rightful heir to his throne. But to prove their true leadership they must round up civilians to take the field and not just trained soldiers. Through a battle of wits and steel, the brothers compete in a game of chess with human players that include seasoned warriors, various townsfolk and an odd band of misplaced Vikings.

Thieves Guild Cast of Characters
